

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

ORDER NO. 81-22

NPDES NO. CA0028584

WASTE DISCHARGE REQUIREMENTS FOR:

SILICONIX INC.
SANTA CLARA, SANTA CLARA COUNTY

The California Regional Water Quality Control Board, San Francisco Bay Region, (hereinafter called the Board) finds that:

1. Siliconix Inc., hereinafter called the discharger, submitted a report of waste discharge (NPDES Short Form C) dated September 20, 1980 applying for waste discharge requirements and a permit to discharge wastes under the National Pollutant Discharge Elimination System.
2. The discharger is manufacturing electronic devices using semiconductor manufacturing processes. The discharger proposes to discharge up to 175,000 gallons per day of reverse osmosis reject water to a storm drain tributary to San Tomas Aquino Creek tributary to Guadalupe Slough and South San Francisco Bay, all waters of the United States.
3. The Board, in April 1975, adopted a Water Quality Control Plan for the San Francisco Bay Basin. The Plan contains water quality objectives for San Francisco Bay.
4. The beneficial uses of San Tomas Aquino Creek Guadalupe Slough and South San Francisco Bay are:
 - a. Recreation
 - b. Fish migration and habitat
 - c. Habitat for wildlife
 - d. Esthetic enjoyment
 - e. Industrial water supply
 - f. Navigation
5. Effluent Limitation and toxic effluent standards established pursuant to Sections 208(b), 301, 304, and 307 of the Federal Water Pollution Control Act and amendments thereto are applicable to the discharge.
6. The issuance of waste discharge requirements for this discharge is exempt from the provisions of Chapter 3 (commencing with Section 21000) of Division 13 of Public Resources Code (CEQA) in accordance with Water Code Section 13389.

7. The Board has notified the discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for the discharge, and has provided them with an opportunity for a public hearing and an opportunity to submit their written views and recommendations.
8. The Board in a public meeting heard and considered all comments pertaining to the discharge.

IT IS HEREBY ORDERED that, Siliconix Inc., in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, and the provisions of the Federal Water Pollution Control Act and regulations and guidelines adopted thereunder, shall comply with the following:

A. Effluent Limitations

1. The discharge of an effluent in excess of the following is prohibited:

| | <u>Units</u> | <u>Daily Maximum</u> |
|---------------------------|-----------------|----------------------|
| a. Total Dissolved Solids | mg/l | 2,000 |
| b. Flow | gallons per day | 175,000 |

2. The effluent shall not have a pH of less than 6.5 nor greater than 8.5. If the influent water exceeds these limits, the discharger will not cause any further variance.
3. The effluent shall not have a chlorine residual greater than 0.0 mg/l.
4. In any representative set of samples the waste as discharged^d shall meet the following limit of quality:

TOXICITY:

The survival of Rainbow Trout test fishes in 96 hour bioassays of the effluent shall achieve a median of 90% survival for three consecutive samples and a 90 percentile value of not less than 70% survival for 10 consecutive samples.

5. The discharge shall be limited to wastewater of the quantity and type described in finding 2 of this Order.

B. Receiving Water Limitations

1. The discharge of waste shall not cause the following conditions to exist in waters of the State at any place:
 - a. Floating, suspended, or deposited macroscopic particulate matter or foam;

- b. Bottom deposits or aquatic growths;
- c. Alteration of temperature, turbidity, or apparent color beyond present natural background levels;
- d. Visible, floating, suspended or deposited oil or other products of petroleum origin;
- e. Toxic or other deleterious substances to be present in concentrations or quantities which will cause deleterious effects on aquatic biota, wildlife or waterfowl, or which render any of these unfit for human consumption either at levels created in the receiving waters or as a result of biological concentration.

C. Provisions

- 1. The discharger shall comply with all effluent and receiving water limitations and provisions of this Order immediately upon discharge.
- 2. The dischargers shall file with the Board technical reports on self-monitoring work performed according to the detailed specifications contained in any Monitoring and Reporting Program as directed by the Executive Officer.
- 3. This Order includes the attached "Standard Provisions" dated April 1977 except Provisions and Requirements A.5, A.7, A.12, A.13, A.16, B.3 and B.5.
- 4. This Order shall serve as a National Pollutant Discharge Elimination System permit pursuant to Section 402 of the Federal Water Pollution Control Act, or amendments thereto, and shall take effect at the end of ten days from date of hearing provided the Regional Administrator of the U. S. Environmental Protection Agency has no objections.
- 5. This Order expires on May 19, 1986. The discharger must file a Report of Waste Discharge in accordance with Title 23, Chapter 3, Subchapter 9, of the California Administrative Code not later than 180 days in advance of such expiration date as application for issuance of new waste discharge requirements.

I, Fred H. Dierker, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region, on May 20, 1981.

FRED H. DIERKER
Executive Officer

CONSISTS OF

PART A

AND

PART B

PART B

I. DESCRIPTION OF SAMPLING STATIONS

A. Effluent

| <u>Station</u> | <u>Description</u> |
|----------------|---|
| E-001 | At any point in the outfall between the point of discharge and the point at which all waste tributary to that outfall is present. |

II. SCHEDULE OF SAMPLING AND ANALYSIS

- A. The schedule of sampling and analysis shall be that given as Table I.
- B. Reports shall be submitted on April 15, July 15, October 15 and January 15.

I, Fred H. Dierker, Executive Officer, hereby certify that the foregoing Self-Monitoring Program:

1. Has been developed in accordance with the procedure set forth in this Regional Board's Resolution No. 73-16 in order to obtain data and document compliance with waste discharge requirements established in Regional Board Order No. 81-22.
2. Does not include the following paragraphs of Part A:

D.1, D.2.a, D.3, D.4, E.2.b, E.2.c, E.3, E.4, F.2, F.3.b, F.3.c, F.3.d, F.3.e, F.3.f and F.3.g.
3. Is effective on the date shown below.
4. May be reviewed at any time subsequent to the effective date upon written notice from the Executive Officer or request from the discharger, and revisions will be ordered by the Executive Officer.

FRED H. DIERKER
Executive Officer

LEGEND FOR TABLE

TYPES OF SAMPLES

G = grab sample
 C-24 = composite sample - 24-hour
 C-X = composite sample - X hours
 (used when discharge does not
 continue for 24-hour period)
 Cont = continuous sampling
 DI = depth-integrated sample
 BS = bottom sediment sample
 O = observation

TYPES OF STATIONS

I = intake and/or water supply stations
 A = treatment facility influent stations
 E = waste effluent stations
 C = receiving water stations
 P = treatment facilities perimeter stations
 L = basin and/or pond levee stations
 B = bottom sediment stations
 G = groundwater stations

FREQUENCY OF SAMPLING

| | | |
|---------------------|--|---------------------|
| E = each occurrence | 2/H = twice per hour | 2H = every 2 hours |
| H = once each hour | 2/W = 2 days per week | 2D = every 2 days |
| D = once each day | 5/W = 5 days per week | 2W = every 2 weeks |
| W = once each week | 2/M = 2 days per month | 3M = every 3 months |
| M = once each month | 2/Y = once in March and once in September | Cont = continuous |
| Y = once each year | Q = quarterly, once in March, June, Sept. and December | |
